

CROMER TOWN COUNCIL

Press Release – Roadworks

Please be advised that over the next few weeks NCC Highways, BT, Anglian Water, National Grid Gas and others will be undertaking works in Cromer which necessitate traffic signals and the closure of some roads. Diversions will be in place as appropriate.

The works have been coordinated to take place over as short a time scale as possible and where necessary will be followed by resurfacing of the roads.

A representative from NCC Highways is today hand delivering the attached letter to all traders in the town centre to draw their attention to the resurfacing works.

Highways have also drafted the attached spreadsheet which lists all the street works. Please note that these dates are subject to amendment but are correct at the time of preparing this press release.

Cromer Town Council ask that you please help publicise these works and stress that whilst there may be some inconvenience, the end result will be the completion of the works to the bus station, new footways, improved broadband, completion of other utility works and resurfaced roads.
