Cromer NYD Fireworks – Photography Competition

In 2022 Titanium Fireworks would like to support the Cromer NYD Fireworks Display by offering a prize for a photography competition. We are aware that there is a pre-existing competition that runs which attracts a great entry level. The competition will run to the same rules and standards as already exist, but will be judged separately by a professional photographer, the firer of the show, and a manager of Titanium Fireworks.

Submission of entries and entry criteria will be the same as the competition that already runs.

Prize – We will provide backstage access to any of our shows throughout the following year to photograph the setup and shoot from a unique angle during the show of the winner's choice.

As with the other competition this is not open to professional photographers and no images taken may be used for financial gain of the winner. You may also not enter if you have previously won the competition.

It is understood that certain projects that we work on have restricted access and while we will make every effort to permit access for the winner the project management team (our end client) will have ultimate decision.

Some elements of our setup at certain sites are commercially sensitive and as such we may ask that certain elements are not photographed.
